What a great effort from Kooltech Glasgow!

KOOLTECH CLIMB FOR CALUM!

Big congratulations belong to Kooltech Glasgow and Pump House Area Sales Manager Leona, who successfully conquered Ben Nevis on Saturday 23rd June.

It was a great team effort, with a 4,500 ft. climb over 7 miles followed by a 7 mile descent!

Billy Thomson, from Scotland Project Sales team, commented after the event saying: *"It was the hardest thing I've done since having two daughters"*.

The team pulled together and raised a whopping figure of **£2367 for Calum's Cabin!** Calum's cabin is a purpose built countryside retreat situated on the Isle of Bute. This self-catering accommodation provides respite and time to make irreplaceable memories for children suffering from cancer along with their families.

The team are very grateful to Arnold Clark for putting on the transport for the day so they could concentrate on their drinking after the event and a big thank you to Kooltech's colleagues, customers, friends and family for their thoughtful donations towards a really important cause.

Product Selection: Flexi Support Systems

We recently became part of The Royal Institute of British Architects and our **Flexi Support Systems** range can now be found under **RIBA Product Selector** website and offers a complete range of free standing building services supports. These flat roof, non-penetrative support frames and feet are designed to support plant rooms, chillers, air-handling units, condensers,

heat pumps, fans, pipes, ducts, cable ladders and cable trays. Pump House also provide standard safe access solutions such as Step-Overs and Hop-Overs, and offer bespoke plant decks, walkways and ramped access platforms. All are designed to comply with British Standards and steelwork is hot dip galvanised, and the frameworks are supplied with M24 adjustable leg assemblies to cater for typical flat roof falls.

1. What is RIBA for architects?

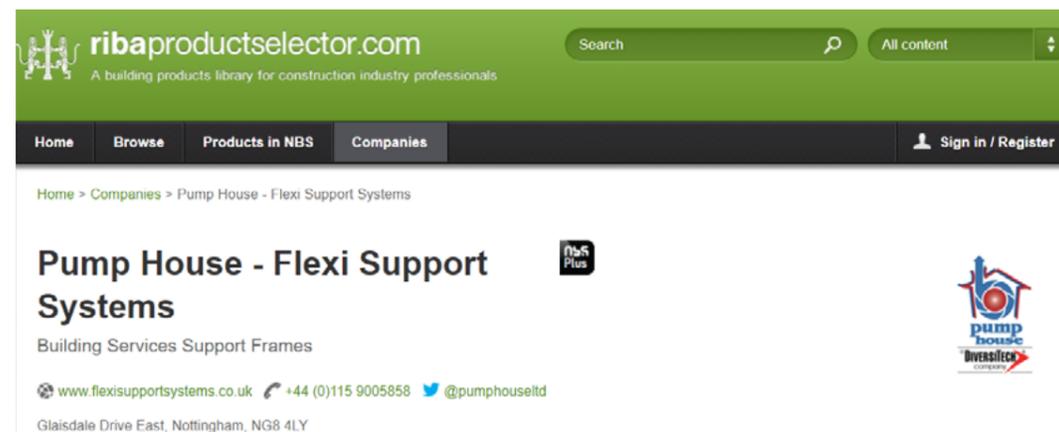

The Royal Institute of British Architects (RIBA) is a professional body for architects primarily in the United Kingdom, but also internationally. It was

founded for the advancement of architecture under its charter granted in 1837 and Supplemental Charter granted in 1971.

2. The RIBA Product Selector is a publication of construction product manufacturers and advisory organisations used by architects and other construction industry professionals to specify building products. It is also available online at www.ribaproductselector.com RIBA Product Selector is the industry-leading and definitive online resource to research and select construction product and service information for all types of building design projects.

3. What is NBS Plus

NBS Plus is a library of building product manufacturers' details linked to clause guidance in the NBS specification products NBS Create, NBS Building, NBS Engineering Services and NBS Landscape.

NBS Plus is updated regularly, so you can be confident that you are always referencing the very latest manufacturer product information. NBS is the preferred specification system for the construction industry, used by the majority of architectural and design practices in the UK.

NBS Plus is a dedicated section of manufacturers' technical product information which is embedded into relevant specification clauses within this system. This means that your products can be instantly added into a project specification by a designer, architect or contractor.

KEEP IT FRESH AND COOL

Our range of fan motors are ideal for replacement in nearly all industrial and commercial refrigeration and ventilation equipment.
