Cable Tie Channel Clips

Channel cable tie clips accommodate PVC or metal cable ties up to a width of 17mm and come in three support base lengths of 50, 65 and 80mm. The channel clips are secured on the channel with a twist lock motion ready for the cable tie to be inserted to secure the refrigeration pipework.

Technical Data

Clips can be used in temperatures ranging from -40 to 140°C. They have a melting point of 220°C. They can withstand pressures up to 40 MPa, with less than 4% deformation, and provide high resistance to mechanical stress creep. As well as resisting all known solvents, the clips have a low moisture sensitivity. They also have stable electrical and vibration properties and a high resistance to UV light.

Material Specification

- Clips are made from a composite polyamide (nylon) alloy which has similar tensile strength properties to nylon but better impact strength, especially at low temperatures.

The Package

Supplied in Packs of 10

| Part Code | Size | Pack Quantity |
|-----------|-------|---------------|
| CTC-050 | 50 mm | 10 |
| CTC-065 | 65 mm | 10 |
| CTC-080 | 80 mm | 10 |
