Flexi Heavy-Duty Range

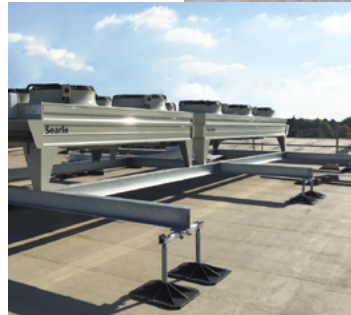

Did you know that in addition to our versatile Base and Extender frame range, we also have a heavy duty alternative framework for larger services?

Frameworks are assembled from standard set length end bars and cross bars to accommodate almost any size of the services being supported. Robust 50x50 SHS end bars, combined with 100x50 RHS cross bars make up the frameworks that's supported through M24 fully adjustable leg assemblies and our larger 500mm² feet.

Available from stock, these larger frameworks have the ability to support even the heaviest of equipment such as large air-handling units.

Hot dip galvanised, and with built-in roof clearance, there is no better way of supporting building services upon flat roofs.

More information on our Flexi Website:

Pump House Pumpkins

Minions, witches, scary faces...we had it all!

Have you been the lucky one and did you get your sweets from spotting ghosts in our October Newsletter?

As you can see, we also had a few pumpkins brought to Pump House, which were mostly made by kids!

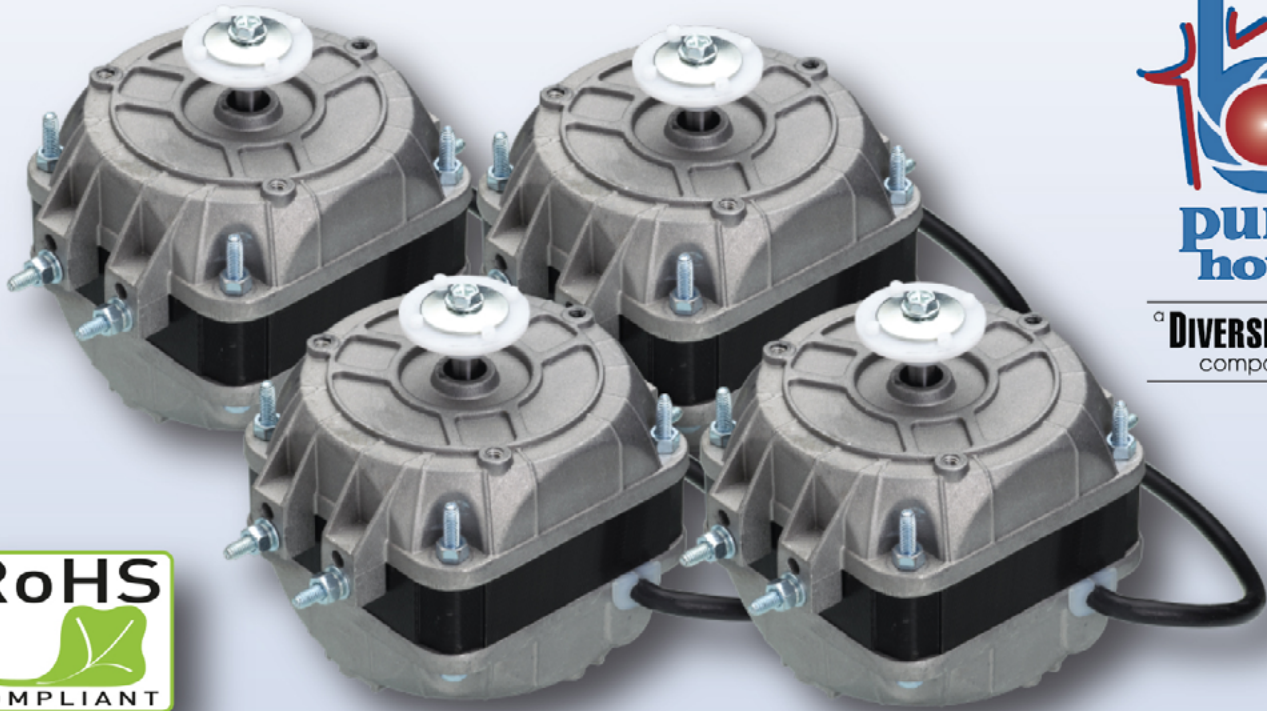

Our special Edition of the Christmas Newsletter comes out the 1st of December including all Promotions we will be doing this year! Don't miss out and make sure you are subscribed to our Newsletter!

You can subscribe to our Newsletter by clicking on the Christmas picture or sending us an email at marketing@pumph.co.uk

Become a fan of our Multi-Fit Motors!

Universal, multi-fit fan motors are ideal for replacement in nearly all industrial and commercial refrigeration and ventilation equipment.

Features include:

- Each fan motor comes individually boxed complete with fixings
- 1 metre power cord cable
- CE certified
- ROHS-2 compliant

Part Code	Description	Watts	Voltage	Frequency	Revs	Cable Length
FM-5W	5W Multi-Fit Fan Motor	5W	240V	50 / 60Hz	1300 / 1500rpm	1m
FM-7W	7W Multi-Fit Fan Motor	7W	240V	50 / 60Hz	1300 / 1500rpm	1m
