

BB-1 - BOILER BUOY CONDENSATE BYPASS VALVE

Low cost, easy to install solution to bypass freezing pipes

Cutting a condensate pipe due to freezing conditions has been commonplace over winter periods. The BB-1 Boiler Buoy condensate bypass valve is a solution that has been designed to be fitted during install, emergency call outs or whilst performing annual service visits. A red float which when visible, indicates that the condensate pipe has a blockage or may be frozen.

The built in tap allows the householder to drain the condensate away safely and ensures that the heating of the property can still work.
